

Figure 1

Figure 2

The diagram shows a rectangular structure composed of several layers and regions. The top edge is divided into sections labeled A, B, C, D, E, F, and G. The bottom edge is labeled A', B', C', D', E', F', and G'. The structure includes a central region labeled 'I' and several other regions labeled with numbers and primes. Arrows indicate the direction of flow or movement within the structure. The layers are labeled 2, 3, 4, 6, 7, 8, 11, 12, 13, 14, 16, 17, and 18. The regions are labeled A, B, C, D, E, F, G, A', B', C', D', E', F', G', and I. The diagram illustrates the internal structure and flow paths of a multi-layered system.
